Hello!

I am currently a second-year B.Tech student specializing in Computer Science and Engineering with a focus on Artificial Intelligence and Machine Learning at ABES Engineering College, Ghaziabad. I hail from Rohini, Delhi, and have a strong passion for cloud computing, particularly with AWS.

To build expertise in this domain, I am actively pursuing AWS certifications and continuously enhancing my cloud knowledge. Additionally, I am learning Java to broaden my programming proficiency and software development skills.

Recently, I completed a **three-month internship as a Cloud Intern at UpToSkills**, from **December 25, 2024, to March 25, 2025**, where I gained hands-on experience with AWS services and real-world cloud projects. This opportunity helped me further solidify my understanding of cloud infrastructure, deployment, and monitoring.

My passion for technology drives me to keep learning and exploring new areas within computer science. I am eager to apply my growing knowledge in a practical environment, especially through internships focused on AWS cloud computing, where I can contribute to impactful and innovative projects.

You will see from my enclosed resume that I meet all of these qualifications and more. I would love the opportunity to discuss how I can contribute to your team. To schedule an interview, please feel free to contact me at 8287216048.

Thank you for taking the time to review my application. I look forward to speaking with you!

Warm regards,
Anushka Bansal
